

FEMALE LEADERSHIP MASTERCCLASS

6 months of integrated leadership training for future-oriented working

FEMALE
LEADERSHIP
ACADEMY

"When I founded the Female Leadership Academy, I had a clear vision: **to empower women in leadership roles and those aspiring to leadership** - through practical workshops, effective methods, and strong networks.

Too often, women in the workplace **face challenges that hinder them from realizing their full potential.**

This is why I created a program that is both practical and immediately applicable. **We are dedicated to supporting women in enhancing their leadership skills and achieving their goals.**

Together, we can shape a future where female leadership is not just an option, but a standard."

Vera Marie Strauch, CEO and founder

**FEMALE
LEADERSHIP
ACADEMY**

Focusing on Female Leadership!

There are many reasons to focus more on women in leadership. Here are two that we consider particularly important.

Click here for the study:

Retaining talent

Women are 1.5 times more likely to change jobs if they do not see clear career and development opportunities. Enhancing career prospects for women increases their commitment to the company.

Diverse teams = strong teams

A 2023 McKinsey study shows that companies with high gender diversity in leadership teams are 25% more profitable than the average.

Diverse teams make better decisions, are more resilient, and excel in creative problem-solving.

What is the Masterclass?

The Female Leadership Masterclass is a **6-month online development program for leaders and key players.**

Our integrated training stands out by combining digital tools, live formats, and personal interactions: with weekly video input, peer-to-peer coaching, and accompanying live sessions, we support participants in implementing change processes and concrete projects in their professional lives, as well as in their personal growth.

Academy mentor Vera Strauch and other amazing experts guide participants with practical knowledge in **corporate leadership, management, and psychology.**

Part of your experts

Psychologist **Vanessa Wulf** supports participants in their search for meaningful changes both internally and externally.

Academy founder **Vera Strauch** was among the first women under 30 to lead a medium-sized company in the construction sector. In 2018, she resigned, trained as a coach, and founded the FEMALE LEADERSHIP ACADEMY. She is an expert in leadership, a podcaster, author, host of the program, and guides participants through daily video impulses and online sessions.

Fatma Erol-Kılıç is a trained behavioral and communication coach and moderator with 10 years of expertise in advising NGOs. In the program, she delves into the focus area of assertiveness.

Melanie Kaufmann is well-acquainted with the challenges faced by female leaders, thanks to her 20 years of professional experience in corporate settings. Interestingly, her deliberate decision to transition to the "other side" – working as a coach and trainer – has further fueled her passion for the topic of leadership.

Focus areas of the program
